Survey Practice Book List 2013

This article is an update of the April 2012 [article](#). As the previous year, we organized the books by topics; this should help the readers to focus on their interests.

It is unlikely to list all new books in the field; we did our best scouting different resources and websites. The list is also focusing only on books published in the English language and available for purchase at the time of this review (March 2013). Books are listed based on the relevance to the topic and no judgment is made in terms of quality of the content. We let the reader do so. The journal section signals special issues of interest to *Survey Practice* readers. Finally, this year we started a thematic section with new books devoted to *Infographics* given the interest in the industry as a tool for visualizing data.

well-respected official statistician. He has been succeeded by Stephen Penneck, President, International Association of Official Statistics.

NEW JOURNALS

The *Journal of Survey Statistics and Methodology*, sponsored by AAPOR and the American Statistical Association, will begin publishing in 2013. Its objective is to publish cutting edge scholarly articles on statistical and methodological issues for sample surveys, censuses, administrative record systems, and other related data. It aims to be the flagship journal for research on survey statistics and methodology. It is being published by Oxford University Press.

Political Science Research and Methods (PSRM) is a general political science journal dedicated to publishing original scholarly work of the highest quality from all subfields of political science. The journal specifically focuses on research applying rigorous methods to empirical or theoretical problems and promotes a rigorous scientific approach to the study of politics. *PSRM* welcomes work at the intersection of political science and related disciplines such as economics and sociology.

PSRM is the official journal of the European Political Science Association (EPSA) and strives to become one of the leading journals in political science. *PSRM* will publish two issues in 2013 and then three issues a year from 2014.

Stat is an innovative electronic journal for the rapid publication of novel and topical research results, publishing compact articles of the highest quality in all areas of statistical endeavor. Its purpose is to provide a means of rapid sharing of important new theoretical, methodological, and applied research. *Stat* is a joint venture between the International Statistical Institute and Wiley-Blackwell.

Stat is a scientific journal for the international community of statisticians, researchers, and practitioners in allied quantitative disciplines.

Survey Methods: Insights from the Field is a new online only journal that started its publication in 2013.

The goal of *Survey Methods: Insights from the Field* is to promote professional exchange on practical survey research issues and discussion on new and promising paths in survey research. The journal will be orientated toward the daily work of surveying, including questionnaire design, sampling, interviewer training, fieldwork administration, data preparation, documentation, and dissemination. The focus of the journal is on practical issues of survey research. The journal will be edited jointly by Swiss Foundation for Research in Social Sciences (FORS) and German Social Science Infrastructure Services (GESIS) and supported by an Editorial Board of approximately 20 colleagues. The review process will be performed with regard to topic, scientific and/or practical added value, style, grammar, and netiquette.
